persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

National Agricultural Statistics Service

TITLE: Conservation Effects Assessment Project

OMB CONTROL NUMBER: 0535-0245

SUMMARY OF COLLECTION: General authority for these data collection activities is granted under U.S. Code Title 7, Section 2204(a). The National Agricultural Statistics Service (NASS) primary function is to prepare and issue official State and national estimates of crop and livestock production, disposition and prices. The goal of this information collection is to obtain land management information that will assist the Natural Resources Conservation Service in assessing environmental benefits associated with implementation and installation of associated conservation practices of various conservation programs such as the Environmental Quality Incentives Program, the Conservation Reserve Program, the Wetland Reserve Program, and other conservation programs.

NEED AND USE OF THE INFORMATION: The survey will utilize personal interviews to administer a questionnaire that is designed to obtain from farm operators field-specific data associated with selected National Resources Inventory sub-sample units in the contiguous 48 States. Data collected in this survey will be used in conjunction with previously collected data on soils, climate, and cropping history to model impacts of conservation practices on the larger environment. USDA needs updated scientifically credible data on residue and tillage management, nutrient management, and conservation practices in order to quantify and assess current impacts of farming practices and to document changes. The assessment will be used to report progress annually on Farm Bill implementation to Congress and the general public.

DESCRIPTION OF RESPONDENTS: Farms

NUMBER OF RESPONDENTS: 15,234

FREQUENCY OF RESPONSES: Reporting: Annually

TOTAL BURDEN HOURS: 13,080
